

Andrew Beliwine

Permanent Address: New York, NY 10044 | andrewbeliwine@gmail.com | (917) 885-4877 | [LinkedIn Profile](#) | [Github](#)

EDUCATION

Johns Hopkins University <i>Bachelor of Science in Computer Science, Minor in Robotics</i>	Baltimore, MD <i>Graduating May 2027</i>
Involvement/Affiliations: Association for Computing Machinery, ASME, National Society of Black Engineers, AstroJays (Hopkins Rocketry), JHU Mars Rover Team, Inroads	

RELEVANT COURSEWORK

- Databases, Information Retrieval and Web Agents, Computer System Fundamentals, Intermediate Programming, Data Structures/Algorithms, Intro Algorithms, Computer Vision, Parallel Programming and Performance Engineering
- Intro to MechE Design and CAD, Intro to Mechanics I/II, Linear Algebra, Full stack JavaScript, Blockchains and Cryptocurrencies, Human-Computer Interaction
- Mathematical Foundations for CS, Intro to Computer-Aided Design, Intermediate Probability and Statistics, Linear Algebra, Dynamics of Robots and Spacecraft, Accessible Computing, Algorithms for Sensor-Based Robotics

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML, CSS, Assembly, SQL, Solidity
Developer Tools/Software: Git, Github, VS Code, IntelliJ, PyCharm, Linux, Unix, MySQL, Google Cloud Platform, Replit, CodePen, Node.js, pnpm, Docker, React, ORMs, Postman, Bitcoin/Ethereum Blockchain, Cursor, ROS
CAD Softwares: SolidWorks, Creo Parametric, Rhinoceros 3D
Design/Creativity Tools: Figma, Adobe Photoshop, Canva
Productivity Software Applications: Microsoft Office Suite, Google Suite, Microsoft Teams, Slack, Zoom

EXPERIENCE

Digital Accessibility Internships <i>American Foundation for the Blind (AFB)</i>	June 2026 – Present <i>Remote</i>
Digital Accessibility Work Study Intern - Applying Web Content Accessibility Guidelines (WCAG) and ARIA attributes to authentic engineering projects, seamlessly integrating inclusive design into the software product lifecycle. - Collaborating with accessibility professionals to evaluate and enhance interactive web components, ensuring robust digital inclusivity and compliance with technical standards.	August 2026 – Present
Digital Accessibility Bootcamp Intern - Conducted technical accessibility audits on web components and mock reservation systems using macOS VoiceOver, Chrome, and standard screen readers. - Evaluated UI component states, color contrast ratios, alternative text, and keyboard focus order across enterprise platforms to identify and document accessibility barriers.	June 2026 – August 2026
Chemistry Stockroom and Logistics Assistant <i>Johns Hopkins University Department of Chemistry</i> - Managed inventory databases and tracking systems, processing shipment data to streamline logistics for multiple research groups. - Improved data accuracy and operational workflow by standardizing verification procedures for incoming laboratory materials.	March 2026 – Present <i>Baltimore, MD</i>
BDP Summer Fellow and Research Assistant <i>Johns Hopkins University</i> - Developed computational tools and Afrofuturism-informed educational materials for the R-RIGHTS initiative. - Built interactive storytelling features and integrated archival databases for the 400 Years+ Project website. - Analyzed qualitative and historical datasets to support computational research for STEM conference proposals and publications.	June 2025 – August 2025 <i>Baltimore, MD</i>
Athletic Permits Intern <i>New York City Department of Parks & Recreation</i> - Maintained athletic permit issuance databases, performing data entry and record updates to track facility utilization. - Generated data-driven reports and presentations analyzing permit activity and scheduling trends for internal stakeholders. - Coordinated athletic field inspections and managed communications with permit holders to ensure operational compliance.	June 2024 – August 2024 <i>New York, NY</i>

PROJECTS

FluxTrak (Issue Tracker) <i>React, TypeScript, Tailwind CSS</i> - Developed a dynamic issue tracking web application using React and TypeScript, implementing custom state management hooks to handle task creation, assignment, and status workflows. - Built a responsive, accessible user interface with Tailwind CSS, integrating persistent browser storage to maintain ticket data and user configurations across sessions.	July 2026 – Present
Tennis Statistics Database <i>Python, PHP, MySQL, JavaScript</i> - Engineered a full-stack analytics platform modeling 50+ years of ATP/WTa match data into a 3NF MySQL database, utilizing a Python ETL pipeline to resolve format inconsistencies and ID collisions. - Developed a PHP/JavaScript frontend featuring debounced AJAX search and Chart.js visualizations, optimizing database query performance via BTREE/HASH indexing and session caching.	January 2026 – May 2026
